Customer Problem Statement Template:

To define the core problems guests, hotel staff and administrators face when discovering and booking hotel rooms online, and use those insights to guide the development of HotelPro.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a guest planning a family trip	book a room for my dates	the room I choose gets booked by someone else for overlapping dates and payment sometimes fails	there is no date clash check or conflict-free booking at the time of reservation	frustrated and anxious about losing my booking and money.
PS-2	a frequent traveller visiting a busy city	find which rooms are free for my check-in and check-out dates	I have to call hotels or check several sites and pages	there is no live room availability search by dates and filters are weak	annoyed and that I am wasting time.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-3	a guest comparing rooms before booking	see what each room looks like, with its amenities, before I pay	rooms are shown only as a type and a price	there are no room photos, gallery or amenity details on the booking page	unsure and worried that the room will not match what I paid for.
PS-4	a customer whose plans have changed	cancel my booking and know the status of my payment	the cancellation rules and payment or refund status are unclear	policies are hidden and payment status is not tracked or shown	worried and unsure whether I can trust the hotel.
PS-5	a front-desk staff member handling arrivals and departures	check guests in and out and know which rooms are occupied	records are kept by hand and clash with online bookings	bookings, room status and check-in / check-out are handled in separate registers	stressed and unable to plan rooms and housekeeping well.
PS-6	a hotel administrator	monitor bookings, payments, rooms and revenue	data is spread out and hard to audit	there is no central dashboard, room management tool or analytics	overwhelmed and slow to respond to problems.
